Serial partner for technically demanding plastic parts.

Injection molding · Assembly · Tooling. Part of the OECO Group, with our own toolshops in Slovenia & China.

SPECIALISATION

Technically demanding parts

Injection molding and assembly of technically demanding, high-volume plastic components for automotive, electrical and home appliance industries.

HERITAGE

Founded in 2016

Founded in 2016 and built on years of hands-on production experience, ORO Plastika has grown into a trusted partner for technically demanding plastic components.

CAPABILITIES

Molding to assembly

Standard & 2K injection molding, prototype development, small series, full assembly and mold testing.

Industries we serve.

- Automotive
- Electrical / electronics
- Home appliances

Serving international and domestic markets: high-volume series as well as one-time prototype projects.

IN-HOUSE · INSERT ASSEMBLY

Molded & assembled parts

ONE PARTNER

Molding → assembly → packaging

Injection molding, metal-insert and sub-assembly work, mold testing and packaging are handled in-house — one supplier, one responsibility for the finished part.

Quality standards.

ISO 9001:2015

Quality management system

IATF 16949

Automotive quality standard

Zero-defect strategy

On-time delivery · Fast response to customer requirements

PART OF THE OECO GROUP

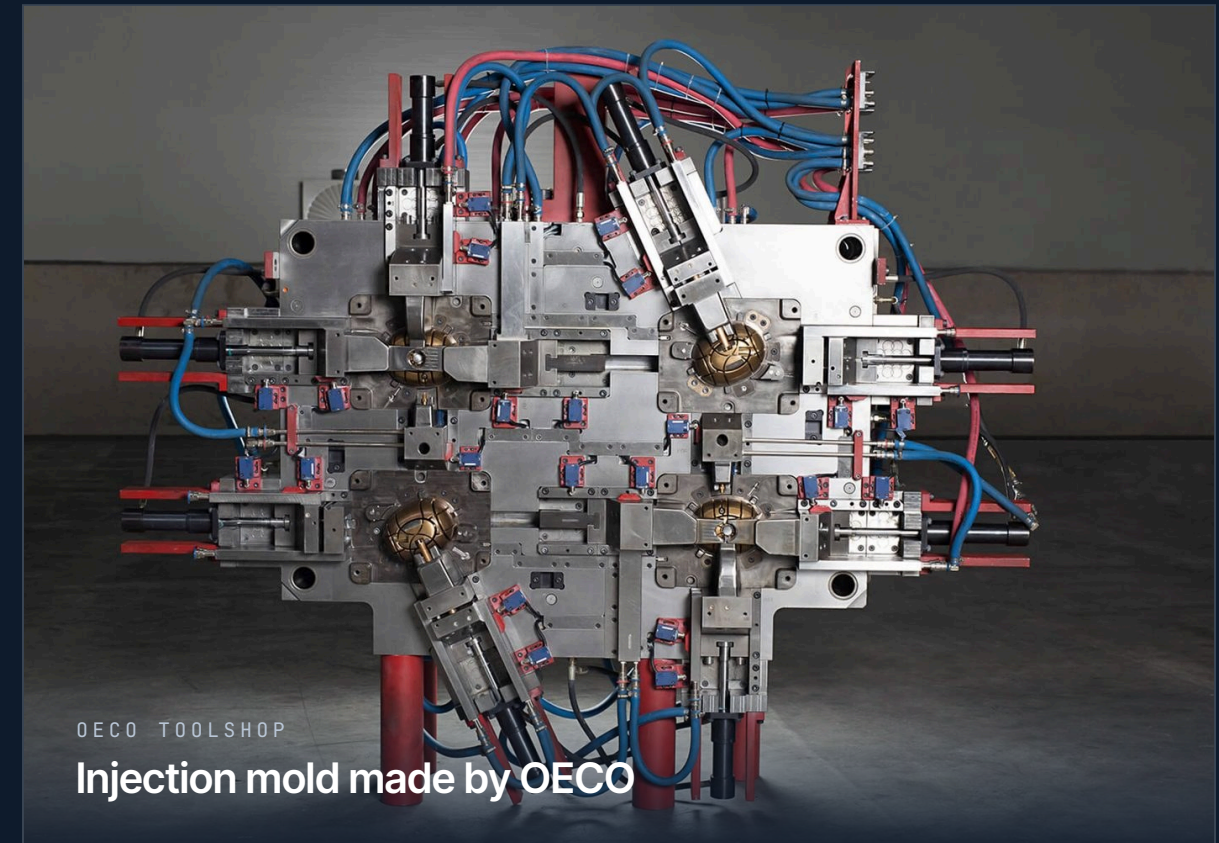

In-house tooling in Slovenia & China.

ORO Plastika is part of the OECO Group, giving us direct access to our own precision toolshop in Slovenia and a fully controlled toolshop in China. Full control over tool quality, faster lead times, no dependency on external toolmakers.

- 1000+ injection molds delivered
- 70–100 tools / year capacity
- Tool modifications, repairs & maintenance
- Full after-sales tooling support
